THE "FLYING TRIANGLE" RETURNS!

Once more, we have received reports of an unusual triangular flying object moving around our night sky in the East Midlands area. The latest witnesses included a member of the PRA, his daughter and her boy friend who spotted the object on the night of November 11th. Previous to that, Mark Haywood of Mansfield had an encounter with a similar object on the night of 3rd November. We have also received a report dating back to 1984 of a triangular shaped object hovering over the Long Eaton water works in 1984. *(See OVNI December 1991 UFO Over Water Works in 1989- also Long Eaton!)

11th November 1992 2150

Garry Stapleton, his daughter Emma and her boy friend Shaun were driving along a country road near Breadsall, when they noticed a single point of bright light in the North-West. The light appeared to be approaching them and the car was halted and the windows wound down.

Fortunately, Garry had a pair of 8x50 binoculars with him and was able to observe the approaching light. At this stage, he was able to see a number of other lights associated with the object (see sketch). All three occupants of the car got out, and watched fascinated as the lights came closer. There was no discernible noise and the object appeared to be fairly low (estimated height 1,500') and moving at a steady pace, approx. 200mph. It was at this stage that Garry's daughter Emma became worried and wanted to get back into the car.

The lights continued their approach until they were nearly passing overhead. The object was by all accounts pretty large, Garry described it as "awesome". It was at this stage that Shaun took several colour photographs with a small Olympus 35mm camera. (The camera had no telephoto lens and had a coupled flash with each exposure.)

As the huge object passed almost overhead, the group were able to make note of the lighting arrangements, no "strobe" lights were visible and it was not possible to see the shape. No noise other than possibly a faint jet (or airflow) noise could be heard. The object continued on its line of flight in the direction of Castle Donington until it was out of sight.

THE INVESTIGATION

Garry later telephoned the East Midlands Airport, who informed him that no aircraft should have been in that area at the time and certainly not flying that low!.

A Royal Air Force source has stated that the description of the object does not conform with standard aircraft identification lighting.

We have since had the Kodak film processed by the Mallard Laboratories at Kimberley and special arrangements were made to increase the development to compensate for night photography (100ASA increased by two stops).

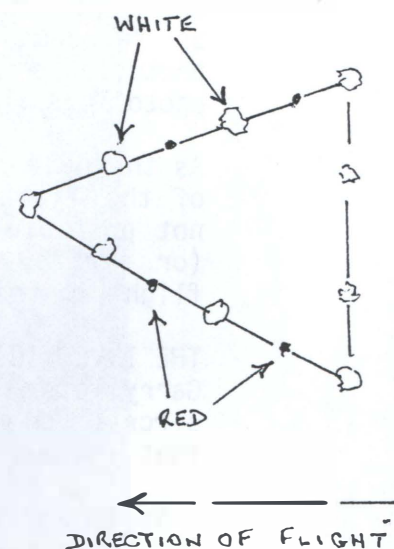

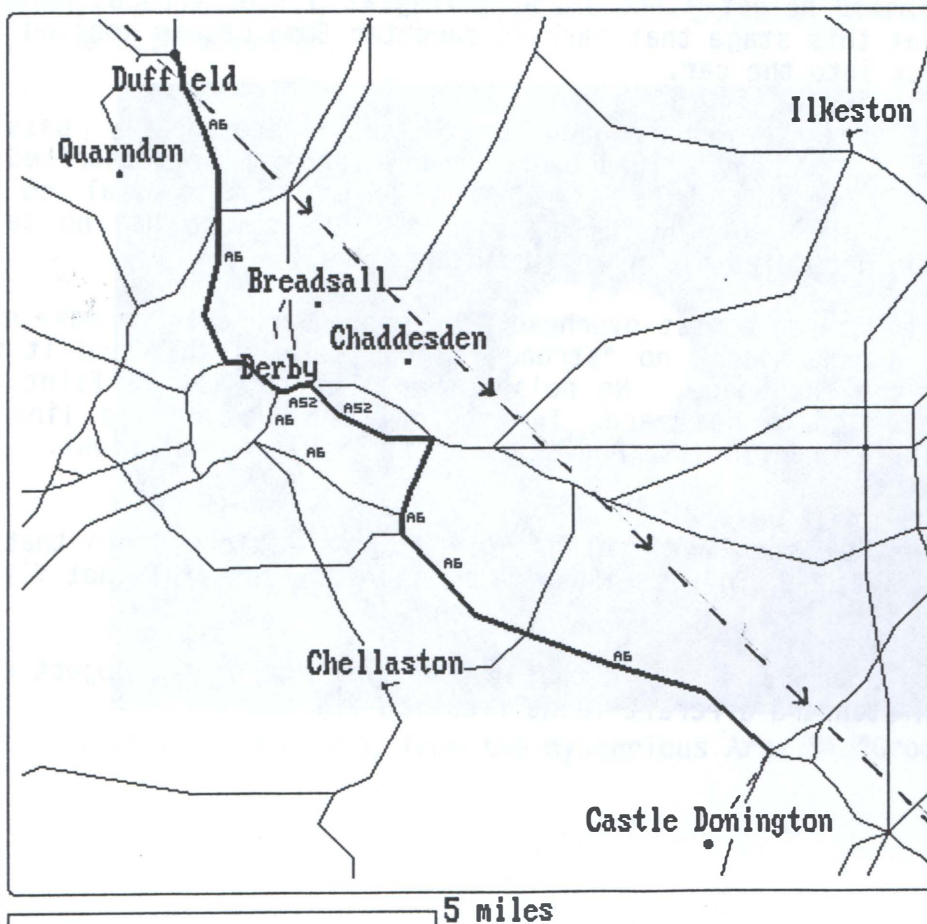

The negatives revealed a number of lights in triangular formation and this confirms the eye witnesses description of the huge size of the object. Further means are being investigated to have the photographs enhanced, this should assist with further analysis and investigation of the object.

There has been some speculation that the object may have been an American Air Force "Stealth" aircraft. They are known to have gone to extraordinary lengths to maintain the secrecy surrounding this aircraft. The size of the craft could possibly have been compared to a B2 "Stealth" bomber and the lighting arrangement could have been a modification of the "Yehudi" lighting used experimentally on earlier aircraft. In this instance, the lights could have been arranged to disguise the actual shape of the aircraft. If the line of the aircrafts flight is extended South East, it would bring it close to the American Air Force base at North Luffenham in Leicestershire.

The argument against the object being a "Stealth" aircraft is:-

- (a) The extremely low altitude of the objects flight
- (b) The absence of flashing "strobe" lights
- (c) The quietness of the object at such a low altitude
- (d) The mounting of numerous lights along the wings, when the whole concept of the "Stealth" craft is to disguise its presence

For no other reason than the aircraft is at present unidentified, it must be classified at present as an "unidentified flying object", a UFO!

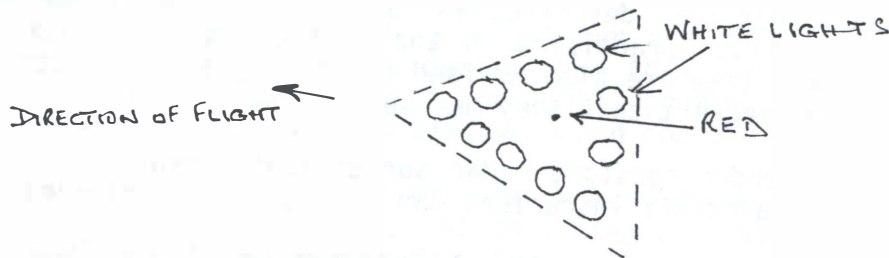

3rd November 1992 2028

Mark Haywood, the investigations co-ordinator of the Mansfield based "Scientific UFO Research Association", had a nerve racking experience, when driving down Newboundmill Lane, Upper Pleasley.

He spotted what he described as a large triangular shaped object, through his car windscreen. Initially, the object appeared to carry three large very bright white lights. The object which was heading towards the car, turned slowly and it was then possible for Mark to observe lines of four bright lights on each side of the object, with a small red light in the centre of the triangle.

Although Mark had a camera with a telephoto lense on the back seat of his car, he was so alarmed by the size of the object that he accelerated away from the scene. However, he did have time to notice the object disappear out of sight over nearby rooftops.

Mark commented that he heard no sound and was certain that the object was not an aircraft.

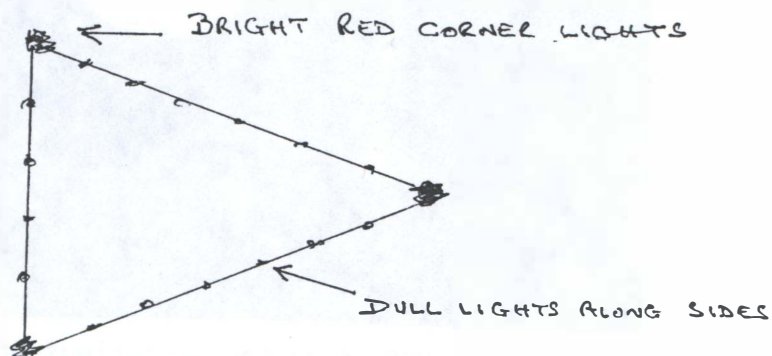

A 1984 "TRIANGLE"

A 64 year old worker at the Little Eaton Water Works, in company with a colleague, noticed a "large set of red lights" over the A38 area at 2am (date not known).

The lights were arranged in a triangular shape, with a bright red light at each corner and dull red lights along each side. No other details could be seen. The dart shaped object stayed in the same position for about an hour and then suddenly disappeared. The triangular object had a sharply defined triangular shape and no noise was heard at the time. The witness is known and vouched for by the incident investigator.

THE MYSTERIOUS "GROOM LAKE" BASE, NEVADA

First established in 1955, Groom Lake lies within the vast American Air Force base (supposedly the size of Switzerland), on the outskirts of Las Vegas, Nevada.

Initially thought to have been built to test fly the U2 spy plane, the base has since been the source of numerous rumours concerning the flying of alien "saucers" that have either been found on our Planet, or have been given to the American Air Force under some unknown agreement.

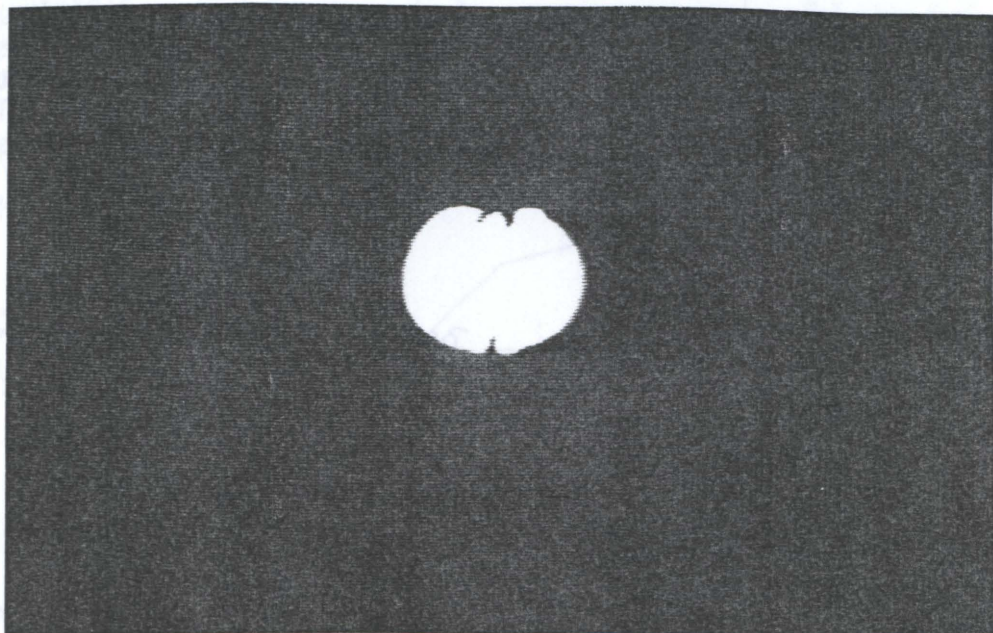

The Groom Lake site, which is in the shape of a triangle in part of the Nellis Air Force Base, was apparently chosen because, surrounded by mountains, it is invisible to any ground level observer.

The entire Nellis Range is ringed with electronic detectors. Security teams both on the ground and in helicopters are able to descend quickly upon any intruders in the area.

Groom Lake itself, has been described as 'a citadel within a fortress' and even AAF military pilots practising on the flying range, are forbidden to overfly Groom Lake. They are also advised not to pay too much attention to any unidentifiable aircraft that they may see in the vicinity.

Nellis AFB is also under constant radar surveillance down to ground level, so the ban on civil aircraft intrusions can be rigorously enforced.

The PRA has recently obtained several interesting videos, one of which claims to show a glowing, pulsating object taking off from Groom Lake in the early hours of the morning. When it is claimed, most top secret test flying is undertaken. This video will be shown at the Stanley Club meeting on the 25th November.

A still of the UFO, from the mysterious Area 51 "Groom Lake" video

DAVID ICKE VISITS NOTTINGHAM

On the evening of the 23rd of October David Icke addressed the students of the Nottingham/Trent College in the Byron Building Nottingham. Omar Fowler and Garry Stapleton attended the meeting.

A few selected extracts from his talk are given below:★

One of the great myths about me is that I have "discovered" religion, nothing could be further from the truth. What I have discovered in my life is that religion, far from being part of the solution, is in its dogmatic form, part of the problem. One myth is a draw, David Icke is apparently a loony. In telling this, if what passes for sanity in the world today, thank God I'm a loony, because if that is sanity, I don't want to be that sane! (applause)

You are sane if you support a system of economic growth, which must destroy the planet, it can't help it. The system I call "take, make and throw away". It takes from the Earth the available resources as fast as it can, it makes those irreplaceable resources into things, products, the vast majority of which, we don't actually need.

You are sane, if you respond to the destruction of this planet by economic growth, by saying we must have more economic growth to spend money on the environment, which is like saying, to put out the fire, put more petrol on it. You are saying to this system, if you think it is fine to treat animals as mere commodities, to be made as fat as possible on as little food as possible, bring death and suffering every year to thousands of animals in the name of economics.

You are saying if you judge your success in health care, not by how many people are healthy, but by how many ill people you have managed to treat. You are saying if you see rising house prices as a sign of economic success when millions are homeless. You are saying that if you think it is O.K. for people to serve the system all their lives and then spit them out whenever it suits you, something which happened to thirty thousand miners this very month.

You are saying to live in peace and democracy, while you are bombing those into submission, physically or economically anyone who doesn't play the game by your rules. You are saying apparently, you believe it is fine to treat less powerful peoples and countries to be used and abused for the good of those that control the world and their economic growth, while those of the poorer countries count their dead! That's why I'm a loony, because if that's sanity, I don't want to be that sane! (applause)

Can anyone still deny that, when you think that every twenty-four hours, an area of tropical forest the size of the Isle of Wight is destroyed or degraded. Deserts advance by a similar area, 200 million tons of top soil are lost through erosion, many increasing numbers of species become extinct **every single day** and one hundred thousand people, nearly half of them children, die through hunger or hunger related disease **every twenty-four hours**. Can anyone still deny that?

To stop this planet being destroyed will involve every major country in the world, agreeing to and implementing immediately, policies that will bring the whole economic system to its knees in the changeover period, before a non-destructive alternative can be put in its place. No one is going to vote for that in anything like the numbers required and anyone who tried to do it would be thrown out democratically before they could do it, such is the programming of the human mind from the cradle to the grave, it has to be done another way.

The most disturbing aspect of this system is that no-one controls it, it controls us, it is a monster out of control, it is a Frankenstein, which once created has grown and grown and taken on a mind of its own. It is not there to serve humanity, humanity is there to serve IT.

In the enlightened West who know it all, we're leading this planet to the brink of non-existence with that nonsense. All along on this planet, there were people who were looked upon as primitive, people who didn't really understand....pat them on the head, give them a bit of land and hopefully they'll go their own way and yet they had "sussed it" from the start.

In 1855 the American government made a bid for Indian land to a group of Indians and particularly to Chief Seattle, they wanted to buy Indian land to destroy it. Chief Seattle flummoxed them with his reply, he didn't play the game of system, he didn't think, they've come to me so I'll whack the price up....this in 1855 was his reply:

"How can you buy or sell the sky, we don't own the freshness of the air or the sparkle on the water, how then can you buy them from us?" "Every power on the Earth is sacred to my people, only in their memory and experience." "We know the White Man does not understand our ways, he is a stranger who comes in the night and takes from the land whatever he needs." "The Earth is not his friend, but his enemy and when he has conquered it, he moves on." "He kidnaps the Earth for his children, his appetite will devour the Earth and leave behind a desert." "If the beasts were gone, we would die with a great loneliness of the spirit, for whatever befalls the Earth, befalls the children of the Earth".

Look what has happened since he said those words! My goodness, that poor primitive man doesn't understand, because the West knows best! It was a point when I began to understand, when I began to appreciate what was happening to this planet and that nothing was going to be done about it.

David Icke discussing a point with Omar Fowler after his talk.

TALE ENDERS

OMAR FOWLER will be appearing on Central TV in the morning question show compared by Mike Scott "The Time And The Place". The programme will be on the subject of UFO's and will be transmitted on Tuesday 24th November (approx 10-10.30am).

We have recently received an OVNI exchange request from the Surrey Investigation Group on Aerial Phenomena (SIGAP) and also from "The Wild Places", a bi-monthly magazine produced in St.Austell, Cornwall.

BUSTY TAYLOR struggled on with his talk and slide show at the last PRA meeting in spite of a heavy cold. Several members also suffered the same symptoms and were unable to attend. Busty's colleague LEONIE STARR, the Australian astrologer, came to the rescue and concluded Busty's talk with comments of her own. The next OVNI will contain details of her predictions concerning the future outlook for us all, which were discussed in an exclusive interview during her recent visit.

BOB DEAN recently appeared on a German TV "Phenomenon" programme and last week he was featured in a new Sky TV UFO series. A few copies of his talk given at the "Quest" Conference in Leeds are still available at £2.00.

The much discussed "EQUINOX" programme on Crop Circles finally appeared on our screens last month. It consisted mainly of old footage previously shown and had little new to add to the subject. The overall impression given was that all Crop Circles are hoaxes. Our own views remain:- There is evidence that single Crop Circles have been around for many years and are part of a natural energy phenomenon. Pictograms which have appeared since the mid-80's, are the result of action by an intelligence - man made hoaxes in many cases, but can this account for all of them?

PAT DELGADO has sent us his comments on the David Icke talk: "Like you, I feel that he has only scratched at the edges of the problems our social systems have produced. Of all our technical achievements to date we need to decide which we should abandon and which should be expanded and improved, who is going to decide or will it be decided for us?"

"Icke has repeated much of what I and many others have been saying for a few years about the benefit of thinking, spiritual consideration and the wide range of vibrations and energies. However, it is one thing to stand back and criticise the system, but no one person or group of people are going to change anything on the required scale, not without a massive course changing intervention from a 'higher level'."

NEXT MEETING

Will take place at the Stanley Club, Stanley Common near Ilkeston (A609)
8pm Wednesday November 25th

Mark Hardwood and Karen Douglas will give a talk, plus give a video presentation on the Mansfield Crop Circles 1992. This will be followed by a video programme showing lights seen over Wiltshire in August 1992, a UFO light over Groom Lake, Nevada and an edited video of the "face on Mars" which has caused much speculation about the current exploration programme.

(admission £1 Non-Members welcome)
